About Me

I am a final-year Computer Science and Engineering student at Green University of Bangladesh. I have a strong foundation in programming with C, Java, and JavaScript, along with practical experience in web design using HTML and CSS. I also have hands-on knowledge of WordPress customization and SEO. I am passionate about learning new technologies and am eager to explore and work with other content management systems (CMS) to expand my skills and contribute to professional web development projects.

PROJECTS (COURSE BASED)

- **Campus360 Solutions** (HTML, Tailwind CSS, JS, React, Node.js, Express.js, MongoDB)
A web platform for managing cafeteria orders and transport tracking in universities.
- **Blood Donating System** (C, Java (Swing), Linked List, Kmp, Dijkstra, DFS, Merge Sort)
Desktop app to manage donors and optimize search using a graph algorithms.
- **Product Service System** (Java; Linked List, Dijkstra, DFS, Merge Sort)
Java-based product management system using custom data structures and algorithms.
- **File Operating System** (Linux, Shell Scripting)
Script-based file handling system for directory management and automation.
